FY MCA- SEM I
IT11 PYTHON
Practice Assignment1

Roll No: 2601196
Name: Ashutosh Uttekar

---

1. **Write a program to read a file and count how many vowels are present in its content.**

Code : 01.py

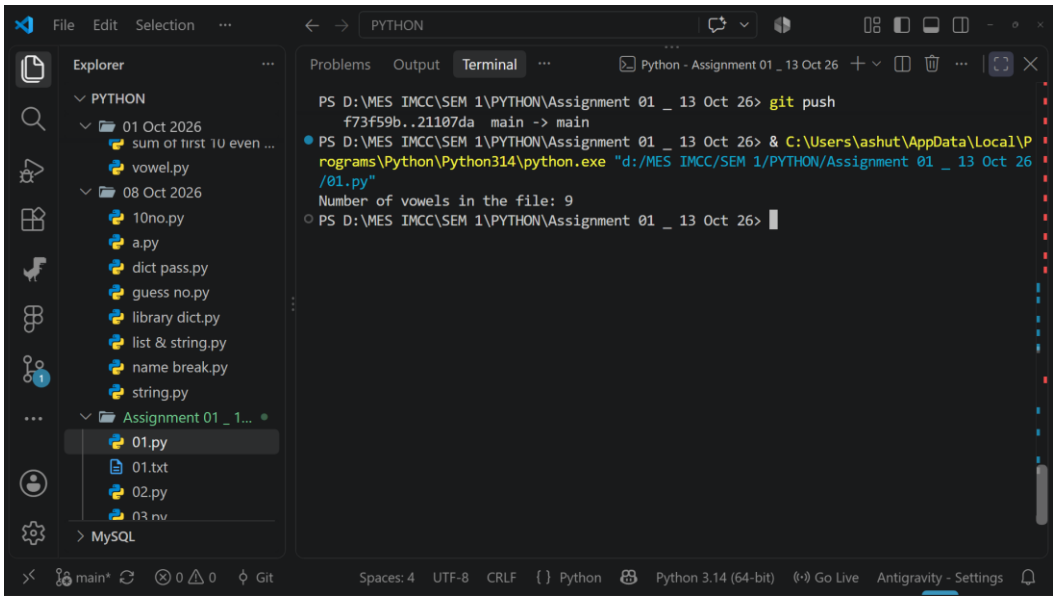

```
with open("01.txt", "r") as file:
    content = file.read()
    vowels = "aeiouAEIOU"
    count = 0

    for char in content:
        if char in vowels:
            count += 1

print("Number of vowels in the file:", count)
```

01.txt

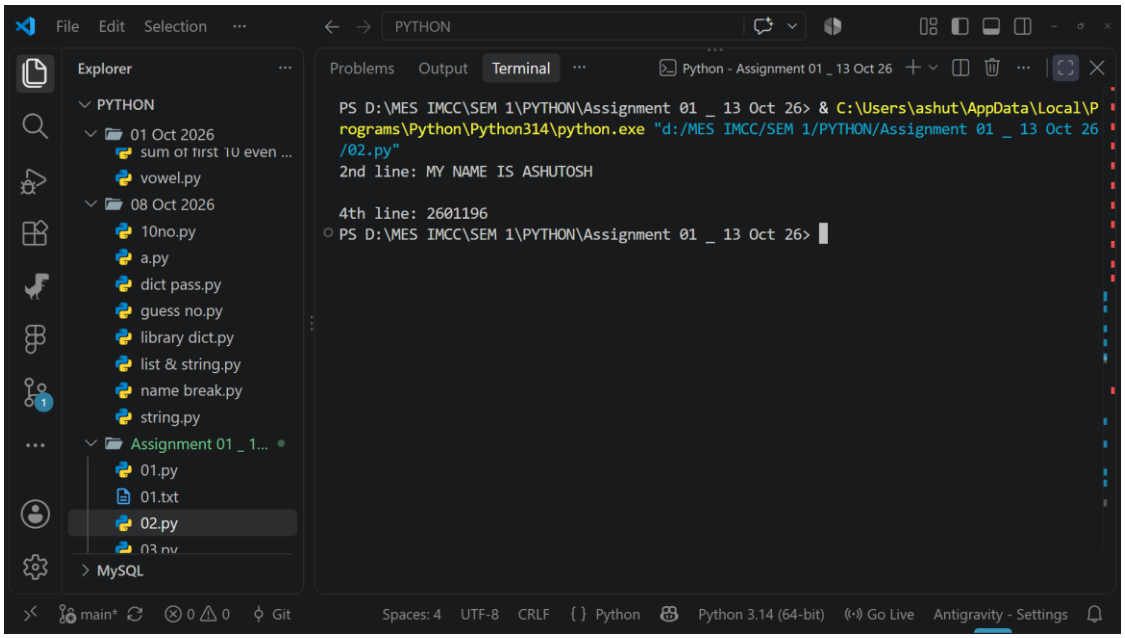

HELLO
MY NAME IS ASHUTOSH
FY-MCA
2601196

2. **Read all lines from a file into a list. Print the total number of lines and display the 2nd and 4th line.**

02.py

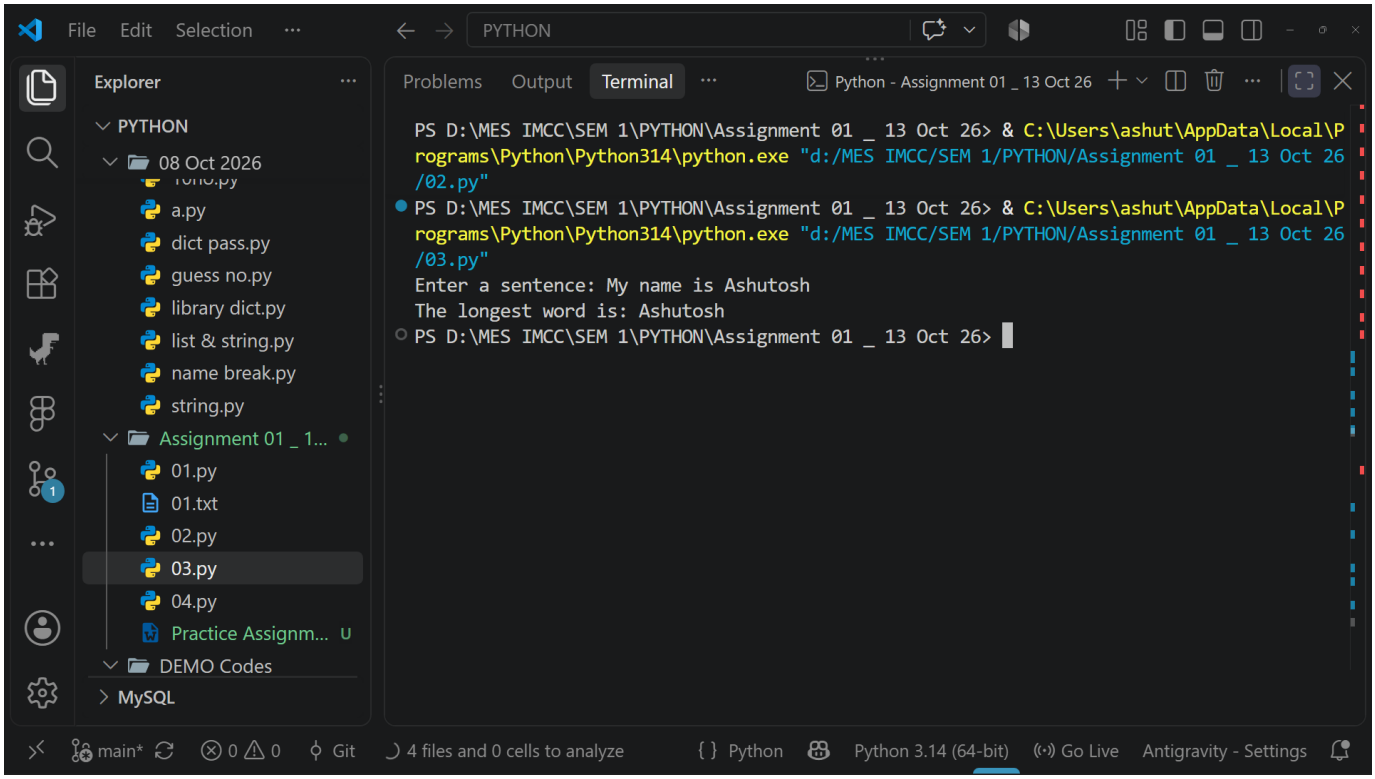

```
with open("01.txt", "r") as file:
    lines = file.readlines()
    total_lines = len(lines)
    print("Total number of lines:", total_lines)
    if total_lines >= 4:
        print("2nd line:", lines[1])
        print("4th line:", lines[3])
    else:
        print("The file does not have enough lines.")
```

3. **Take a sentence from the user, split it into words, and store them in a list. Print the longest word.**

03.py

```
sentence = input("Enter a sentence: ")
words = sentence.split()
longest_word = max(words, key=len)
print("The longest word is:", longest_word)
```

4. **Read a file, split its content into words, and store them in a list.**
    i. **Print the total number of words.**
    ii. **Print all unique words.**

04.py

```
with open("01.txt", "r") as file:
    content = file.read()
    words = content.split()
    total_words = len(words)
    unique_words = set(words)

print("Total number of words:", total_words)
print("Unique words:", unique_words)
```
